

## Sample V Zone Certification

<b>V-Zone Certification</b>				
<b>Property Information</b>			<b>For Insurance Company Use</b>	
Name of Building Owner			Policy Information	
Building Address or Other Description				
City		State		Zip
<b>SECTION I: FLOOD INSURANCE RATE MAP (FIRM) INFORMATION</b>				
<i>Note: To be obtained from appropriate FIRMs</i>				
Community No.	Panel No.	Suffix	Date of FIRM Index	FIRM Zone
<b>SECTION II: ELEVATION INFORMATION</b>				
<i>Note: This form is not a substitute for an Elevation Certificate. Elevations should be rounded to nearest tenth of a foot.</i>				
1. Elevation of the Bottom of Lowest Horizontal Structure Member			_____ feet	
2. Base Flood Elevation			_____ feet	
3. Elevation of Lowest Adjacent Grade			_____ feet	
4. Approximate Depth of Anticipated Scour/Erosion used for Foundation Design			_____ feet	
5. Embedment Depth of Pilings or Foundation Below Lowest Adjacent Grade			_____ feet	
6. Datum Used	_____ NGVD '29	_____ NAVD '88	_____ Other	
<b>SECTION III: FLOOD INSURANCE RATE MAP (FIRM) INFORMATION</b>				
<i>Note: This section must be certified by a registered professional engineer or architect.</i>				
<p>I certify that I have developed or reviewed the structural design, plans and specifications for construction and that the methods of construction to be used are in accordance with accepted standards of practice for meeting the following provisions:</p> <ul style="list-style-type: none"> <li>a.) The bottom of the lowest horizontal structure member of the lowest floor (excluding the pilings or columns) is elevated to or above the BFE; and</li> <li>b.) The pile or column foundation and structure attached thereto is anchored to resist flotation, collapse and lateral movement due to the effects of the wind and water loads acting simultaneously on all building components. Water loading values used are those associated with the base flood including wave action. Wind loading values used are those required by the applicable State or local building code. The potential for scour and erosion at the foundation has been anticipated for conditions associated with the flood, including wave action.</li> </ul>				
<b>SECTION IV: FLOOD INSURANCE RATE MAP (FIRM) INFORMATION</b>				
<i>Note: This section must be certified by a registered professional engineer or architect.</i>				
<p>I certify that I have developed or reviewed the structural design, plans and specifications for construction and that the methods of construction to be used for the breakaway walls are in accordance with accepted standards of practice for meeting the following provisions:</p> <ul style="list-style-type: none"> <li>c.) Breakaway collapse shall result from water load less than that which would occur during the base flood; and,</li> <li>d.) The elevated portion of the building and supporting foundation system shall not be subject to collapse, displacement, or other structural damage due to the effects of wind and water loads acting simultaneously on all building components (wind and water loading values defined in Section III).</li> </ul>				
<b>SECTION V: CERTIFICATION</b>				
<i>(Check: Section III _____ and/or Section IV _____)</i>				
Name of Certifier			Title	
Firm Name			License No.	
Street Address			Phone No. (      )	
City			State	
Signature			Zip	
			Date
